BOTTLE MOUNT VACCINATORS (BMV)

The Prima Bottle Mount Vaccinator is a durable, impact-resistant syringe provides a quick bottle changing system for efficient application of all animal health injectables. The self-contained, one-handed unit is ideal for full mobility and automatic refilling of syringes without the injectable returning to the bottle. The line feed convertible barrels allow convenient change from a bottle mount to a line feed vaccinator.

PREMIUM LINE POUR-ON/DRENCHERS

Prima Pour-On Syringes allow for adjustable dosage increments with an accurate and easy to use dial-a-dose system. The syringes have a shower head nozzle which avoids wastage from splashing as well as an angled nozzle for easy administration. A T-bar applicator is also available.

Automatic drenchers are built at next level standards, suitable for many drenching applications where accuracy and speed are essential. The drenchers have extremely rapid fill time and the dial-a-dose selection allows changes from large to small doses without any product wastage. Accessories include angled, hooked, and floating hook nozzles.

Premium Line Pour-On

Packaged with soft medial grade tubing, two hose armor springs, and lube packet.

D3 NEEDLES

Ideal® D3™ Detectable Needles

Durable. Detectable. Dependable.

NEOGEN's D3™ Detectable needle is the leader when it comes to meat industry safety. With a thick wall cannula and brass hub, needle breakage is greatly reduced over conventional and stainless needles.

Durability

- Superior durability; thick wall cannula and plated brass hubs reduce breakage 6-fold over conventional needles

Detectability

- 100% detectable in metal detection systems vs. only 15% for standard needles

Sharpness

- Precision-ground tip stays sharper longer, allowing for multiple injections without burring

Packaging Features

- Gauge stamped on hub and packed in red cartridges and boxes for easy identification
- Cartridges are tamper-evident with ISO-colored stickers and labeled with needle size and lot number
